

RADIOGRAPHER

Job Purpose: To provide high-quality diagnostic imaging services while ensuring patient safety, comfort and professional standards of care. The position supports OM Imaging's delivery of efficient and patient-centred radiology services.

Suitably qualified candidates who meet the following requirements are invited to apply:

Minimum Requirements:

- A recognised qualification in Diagnostic Radiography or a related radiography field.
- Current registration with the relevant Namibian health professions regulatory body.
- Knowledge of radiation safety, patient positioning and diagnostic imaging procedures.
- Good communication, interpersonal and patient-care skills.
- Ability to work accurately and professionally in a clinical environment.
- Relevant radiography experience will serve as an added advantage.

Key Functions and Responsibilities:

- Perform diagnostic imaging examinations in accordance with approved protocols and professional standards.
- Prepare and position patients correctly for imaging procedures.
- Explain procedures to patients and help ensure their comfort and safety.
- Apply radiation protection and infection prevention measures at all times.
- Operate imaging equipment safely and report equipment concerns promptly.
- Maintain accurate patient and examination records.
- Work closely with radiologists, nurses and other healthcare professionals.
- Participate in quality assurance activities and continuous professional development.
- Maintain patient confidentiality and comply with OM Imaging policies and procedures.

Applications must comprise of the following:

- A cover letter.
- An updated curriculum vitae.
- Copies of academic qualifications and supporting documents.

How to Apply

All vacancies are applied for via the Namibia Integrated Employment Information System (NIES) website. Applicants should follow the vacancy instructions published on NIES and submit all required supporting documents.
